GPPS 153D-TSHT

Description

Empera 153D-TSHT is a general purpose polystyrene with high heat resistance and good flow properties. Empera 153D-TSHT is free of internal lubricants, e.g. zinc stearate. Empera 153D-TSHT can be processed by all the methods normally used for polystyrene. It is preferably processed by extrusion to foamed sheets and boards using a direct gas injection method, especially when using halogenated flame retardant additives.

Examples of Application

Foamed insulation boards (XPS).
